РОСОБОРОНЭКСПОРТ

Rostec presents over 150 product samples at Airshow China

November 06, 2018

Press Release

Rosoboronexport (part of Rostec State Corporation) organizes the united Russian exposition at the International aerospace exhibition Airshow China 2018, being held on 6-11 November in Zhuhai, China.

The united Russian exposition covers an area of about 1.5 thousand sq. m. It comprises of exhibition stands of 14 companies - Russia's largest developers and manufacturers of products for the air force, air defense and space forces. Rostec's leading holding companies - Russian Helicopters, United Engine Corporation (UEC), KRET, Shvabe – take part in the exposition and demonstrate more than 150 state-of-the-art products.

"Airshow China exhibition is among the five largest aerospace shows in the world, and has a great influence on global aviation development trends. At the same time, the Asian market is one of the key ones for us, and China is a strategic partner of Russia in the region. China accounts for more than 15% of Rostec and Rosoboronexport military products portfolio. We also scale up our cooperation in joint civilian high-tech development, such as AHL (Advanced Heavy Lifter) or a wide-body long-haul aircraft", - said Rostec CEO **Sergey Chemezov**.

Russian Helicopters presents Mi-171A2 and Ansat helicopters for the first time in Asia. Both models are to take part in the flight program of the Airshow. Visitors and participants will have an opportunity to see the potential of these machines and to learn more on their technical and operational characteristics. At the end of the Airshow the machines will make their way to a demonstration tour across South-East Asia. The route of Russian helicopters will go through Vietnam, Cambodia, Thailand and Malaysia.

UEC shows its brand new generation civil engine - PD-14, made for MC-21 airliner. It's the first foreign exposition of the engine after it received a Russian type certificate. Also, AL-41F-1S and RD-93 engine units for fighter aircrafts and civil helicopter engine VK-2500PS are being exhibited. Shvabe demonstrates contemporary hydro-stabilized optical systems for aviation and pointing optics at the exhibition.

Rosoboronexport stand presents more than 100 samples of military products made primarily for the air force and air defense that gain traction in the Asia-Pacific region. Among them are multi-purpose fighter SU-35, multi-role fighters MiG-29M/M2, fighter-bomber SU-32, as well as the latest additions to Rosoboronexport catalogue: flying tanker IL-78MK-90A and military-transport aircraft Il-76MD-90A. Apart from that, military reconnaissance and attack helicopter Ka-52, military transport helicopter Mi-171SH and transport-combat helicopter Mi-35M are being presented for potential customers.

Rosoboronexport also displays anti-aircraft missile system S-400 "Triumph", air defense missile system "Tor-M2E" and portable anti-aircraft missile complex "Verba". In addition, the latest anti-aircraft missile complex "Viking" - a continuation of the famous line of ADMS "Buk" developed by "Almaz-Antey" concern - will be shown to foreign buyers for the first time. According to expert estimations, the complex has a leadership potential in the medium-range air defense systems segment.

"Rosoboronexport expects that the participation in the exhibition will provide added momentum to the positive trend of Russian-Chinese relations in military and technical cooperation. Today our strategic partnership is one-of-a-kind: China became the first buyer of the world's best air defense systems S-400 and modern SU-35 aircrafts. In addition, we boost the cooperation in joint high-tech development. I am very glad that any third forces' attempts to interfere in relations between our countries do not lead to the expected effects and are correctly perceived by the Chinese side as unfair competition", - said **Alexander Mikheev**, the head of Rosoboronexport.

Rostec has planned extensive business program within Airshow China 2018, including meetings and negotiations with partners. The Corporation is ready to provide presentations of all the product samples to foreign customers.

Rostec is a Russian State Corporation established in 2007 to promote the development, production and export of high-tech industrial products designed for civil and military applications. The Corporation comprises over 700 organizations that are currently part of eleven holding companies operating in the military-industrial complex and three holding companies working in civilian industry, as well as over 80 directly managed organizations. Rostec's portfolio includes well-known brands such as AVTOVAZ, KAMAZ, Kalashnikov Concern, Russian Helicopters, VSMPO AVISMA, UralVagonZavod, etc. Rostec companies are located in 60 constituent entities of the Russian Federation and supply products to more than 100 countries. The consolidated revenue of Rostec in 2017 amounted to RUB 1 trillion 589 billion rubles, while the consolidated net income and EBITDA amounted to 121 and 305 billion rubles, correspondingly. In 2017 the average salary in the Corporation was 46.8 thousand rubles. According to Rostec's strategy, the main objective of the Corporation is to ensure that Russia has a technological advantage in highly competitive global markets. Rostec's key objectives include the introduction of a new techno-economic paradigm and digitalization of Russian economy.
